

JESSICA BORDA MOLINA

React Frontend Developer

Oikos Monteverde, Bogotá, Colombia
+57 320 443 1290
jessi.borda09@gmail.com

PROFESSIONAL SUMMARY

UX Engineer & Frontend Developer with a background in Architecture, specializing in building production-ready user interfaces using React, Next.js, and TypeScript. I bridge the gap between complex UI design in Figma and scalable frontend implementation, ensuring high standards of accessibility and performance. With professional experience delivering high-volume digital solutions for European agencies, I focus on creating Design Systems that streamline development and ensure visual consistency at scale.

PROFESSIONAL EXPERIENCE

Jan 2025 – Jan 2026

React Frontend Developer | UX/UI Designer

Orbidi Digital - Spain

- Scalable UI Production & Compliance: Designed and delivered 1,000+ UI interfaces for the Spanish "Kit Digital" government program, using specialized plugins to guarantee mandatory government-level accessibility standards across all projects.
- Interactive UI Development: Developed interactive and responsive user interfaces using React and TypeScript, ensuring high-performance and pixel-perfect consistency for international clients.
- Workflow Optimization: Reduced the Design-to-Code transition time by 30% through the implementation of Figma Auto Layout and reusable component libraries tailored for Next.js environments.
- Process Automation: Streamlined high-volume production by creating scalable templates and atomic design systems, maintaining visual quality and structural integrity under tight delivery deadlines.

Jun 2023 – Dec 2024

React Frontend Developer | Design Developer

Tchunza Software For All - Tunja - Colombia

- Full-Stack Application Development: Designed and developed high-performance web applications using Next.js and TypeScript, integrating with FastAPI (REST APIs) to deliver dynamic, data-driven solutions for local businesses.
- Architecture & State Management: Implemented scalable frontend architectures in React, focusing on reusable hooks and efficient state management to handle complex data flows from backend services.
- API Integration & Data Handling: Developed seamless integrations with RESTful APIs, ensuring type safety across the stack with TypeScript and optimizing data fetching strategies for improved performance.
- Database & Backend Synergy: Collaborated on projects requiring SQL database structures and Python-based logic, ensuring frontend components correctly reflected real-time data states.
- DevOps & Deployment: Managed version control using Git and implemented automated deployment workflows, ensuring continuous integration and delivery (CI/CD) for production-ready landing pages and platforms.
- Performance Optimization: Utilized Astro and Next.js for Server-Side Rendering (SSR) and Static Site Generation (SSG), significantly reducing PageSpeed load times and improving SEO for client websites.

Jun 2020 – Oct 2022

3D Designer

MolBor Construcciones - Tunja - Colombia

- Created 3D models and renders for architectural and furniture projects.
- Developed visual proposals aligned with technical and spatial requirements.
- Produced visual material and presentations for clients.

- Web Development: Designed and developed the first version of the company's website using HTML, CSS, and Vanilla JavaScript, improving their digital presence.
- This background strengthens spatial reasoning, composition, and structural thinking applied to modern UI layouts.

EDUCATION

Apr 2019 - Jun 2024	Bachelor’s Degree in Architecture
Feb 2023 - Feb 2024	React Development Advanced Frontend Specialization for Designers A high-intensity program focused on empowering design professionals with technical software engineering skills. Focused on UI/UX engineering and Frontend frameworks, bridging the gap between artistic vision and functional web architecture
Apr 2024 - Present	Individual courses * Next.js & Modern Frameworks: Completed specialized tracks on Next.js and React, focusing on Server-Side Rendering (SSR), Static Site Generation (SSG), and performance optimization for scalable web applications. * Advanced UI/UX & Design Systems: Advanced training in UX/UI Design, mastering Figma (Auto Layout, Design Systems) and Atomic Design principles to create high-fidelity, accessible interfaces. * TypeScript & Logic: Focused on implementing TypeScript within React environments to ensure type safety and cleaner, more maintainable code architecture. * API Integration: Training in connecting Frontend interfaces with RESTful APIs (FastAPI/Python) and handling complex data states.

CORE SKILLS

python	Principiante	TypeScript	Intermedio
React	Avanzado	Next.js	Avanzado
Astro	Avanzado	HTML	Avanzado
CSS	Avanzado	SCSS	Avanzado
Tailwind CSS	Intermedio	Bootstrap	Intermedio
Figma (Auto Layout, Components, Variants)	Experto	Design Systems	Experto
Atomic Design	Experto	Responsive Design	Avanzado
WCAG Accessibility	Experto	Prototyping & Usability	Experto
WordPress	Principiante	Elementor	Principiante
Adobe Suite	Intermedio		

SELECTED PROJECTS

<u>Portfolio</u>	<u>Bauhaus Components</u>
<u>Bauhaus Concept</u>	<u>Quali</u>
